Full Stack .NET Developer | ASP.NET Core • Angular • REST APIs | Cairo, Egypt

PROFESSIONAL SUMMARY

Full Stack .NET Developer with hands-on experience building scalable web applications using ASP.NET Core, Angular, and SQL Server. Experienced in RESTful APIs, enterprise software, Clean Architecture, third-party integrations, and performance-focused backend development. Delivered production-ready solutions across healthcare, digital commerce, and desktop applications.

EXPERIENCE

Accreditation Pioneer International

Nov 2025 – Present

Full Stack .NET Developer

Sheraton, Cairo, Egypt

- Develop and maintain a production Hospital Information System (HIS) supporting 15+ clinical modules – patient management, appointments, medical records, lab, pharmacy, radiology, operating room, billing, and insurance.
- Build RESTful APIs and integrate SOAP services across enterprise modules using ASP.NET Core and ASP.NET Web Forms, bridging legacy and modern systems.
- Implement business logic with C#, EF Core, and ADO.NET; write and optimize SQL Server queries, stored procedures, and views for performance-critical reporting.
- Work within a layered (N-Tier) architecture applying Dependency Injection, the Repository Pattern, DTO-based validation, and SOLID principles to improve maintainability.
- Collaborate within Agile development teams using Azure DevOps (TFS) to manage work items, track progress, participate in sprint planning, and deliver production-ready features.

PROFESSIONAL TRAINING

Information Technology Institute (ITI)

Feb 2025 – Aug 2025

Full Stack Web Development Using .NET – Intensive Bootcamp

Zagazig, Egypt

- Completed an intensive, project-based bootcamp focused on ASP.NET Core, Angular, SQL Server, Entity Framework Core, and RESTful API development.
- Built real-world applications using Clean Architecture, Agile practices, Git, and Azure DevOps while applying modern software engineering principles.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL

Frameworks: ASP.NET Core, Web API, ASP.NET MVC, Web Forms, Angular 20

Databases: SQL Server, EF Core, Dapper, SQLite

Architecture: Clean Architecture, N-Tier, Repository, DI, DTO

Technologies: REST, SOAP, SignalR, JWT, FluentValidation

Tools: Visual Studio, Azure DevOps, Git, Postman, Swagger, SSMS

Exploring: Docker, Microservices, RabbitMQ, Redis, gRPC, Kubernetes, Azure

PROJECTS

Raqmiya – Digital Marketplace | *ASP.NET Core, Angular 20, SQL Server, SignalR, Stripe, Clean Architecture*

- Designed and built the complete backend API (RESTful controllers, SignalR hubs, JWT auth, role-based authorization) for a marketplace connecting creators with customers to sell digital products and services.
- Developed the Angular service layer to consume backend REST APIs and integrated SignalR for real-time communication.
- Applied Clean Architecture (API / Core / Infrastructure), Repository Pattern, EF Core code-first migrations, and DTO validation with SQL Server.

Repair Shop Management System | *C#, Avalonia UI, MVVM, Dapper, SQLite*

- Developed a cross-platform desktop application for repair shop operations – user/role management, invoicing, reporting, and workflow tracking – owning the full lifecycle from requirements to delivery.
- Used MVVM with Avalonia UI, Dapper for lightweight data access, and SQLite for lightweight embedded database.

EDUCATION

El Shorouk Academy

Sep 2019 – Jul 2023

Bachelor's Degree in Computer Science

Cairo, Egypt
